

SATYAM SHARMA

Full Stack Engineer (MERN) · AI/LLM Systems Developer

+91-9798637485 | satyamsharma58025@gmail.com | linkedin.com/in/satyam-sharma-b908a6209 | github.com/satyamsharma58025 | satyamaportfolio.netlify.app | Jamshedpur, Jharkhand, India

PROFESSIONAL SUMMARY

Full-Stack Engineer and AI/LLM Systems Developer with 2+ years of experience designing, building, and shipping production-grade MERN applications and end-to-end AI systems. Proven impact: cut backend response times by 40%, reduced multi-agent task latency by 45%, and scaled a developer community to 2,500+ active members. Specializes in Retrieval-Augmented Generation (RAG), LangChain/LangGraph orchestration, and agentic multi-agent architectures, backed by hands-on production experience across Node.js/Express, React/Next.js, and cloud deployment (AWS, GCP, Docker). Currently modernizing a live ERP system for a manufacturing enterprise while completing an MCA — combines fast execution, ownership, and a track record of measurable results.

TECHNICAL SKILLS

Languages: JavaScript (ES2023), TypeScript, Python, Java, C, C++

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, WebSockets

Databases: MongoDB, PostgreSQL, MySQL, pgvector, Pinecone, ChromaDB, Weaviate

AI / LLM: LangChain, LangGraph, LlamaIndex, OpenAI API, Google Gemini, Hugging Face, RAG, Agentic AI, MCP, Prompt Engineering, Function Calling, Multi-Agent Systems, Embeddings & Semantic Search

Cloud & DevOps: AWS, GCP, Docker, Git, GitHub Actions, CI/CD

Concepts: System Design, Microservices, Agile/Scrum, Data Structures & Algorithms, LLM Evaluation

PROFESSIONAL EXPERIENCE

Software Developer · [Swift Strips India Pvt. Ltd. \(SLTT Group\)](#)

Jamshedpur, India | Apr 2026 – Present

- Own end-to-end maintenance and enhancement of a production MERN-stack ERP system powering daily manufacturing operations, including scrap procurement, batch/heat-number tracking, quality control (CoA), and GST-compliant invoicing with e-way bill generation.
- Lead a discovery-first ERP modernization initiative, auditing existing workflows to identify process gaps and architecting a scalable roadmap for system reliability and performance.
- Partner with cross-functional operations and compliance stakeholders to translate manufacturing requirements into scalable technical solutions for an aluminium recycling enterprise.

Computer Science Instructor · [RMS High School Balichela \(ICSE Board\)](#)

Jamshedpur, India | Sep 2024 – Present

- Designed and delivered a structured CS curriculum covering programming fundamentals, data structures, and full-stack web development to 60+ students across grades 9–12.
- Built and deployed the school's official production website (rmsbalichela.org) using React.js and Node.js, serving 1,000+ monthly visitors.
- Created 15+ interactive coding labs and project-based assignments, improving student project completion rate by 35% compared to the prior academic year.
- Mentored 10 students in building real-world web applications; 3 projects selected for inter-school technology exhibitions.

Backend Developer Intern · [Ricoz Software Solution Pvt. Ltd.](#)

Bangalore, India (Remote) | 2023 – 2024

- Engineered and deployed 12+ production RESTful APIs using Node.js and Express.js, handling **50,000+ daily requests with 99.9% uptime**.
- Optimized MongoDB query performance through strategic indexing and aggregation pipeline redesign, reducing average response time by **40%** and cutting server load by 25%.
- Designed and implemented role-based access control (RBAC) middleware, improving API security and eliminating unauthorized access vulnerabilities.
- Collaborated in a 6-person Agile team across 3 sprint cycles, consistently delivering features on schedule within a remote-first environment.

Data Annotator – Autonomous Driving (LiDAR) · [Fives Digital Pvt. Ltd. \(Tesla Pipeline via Playment\)](#) *Jharkhand, India* | 2021 – 2022

- Annotated 3D LiDAR point-cloud data for Tesla's autonomous vehicle training pipeline, labeling vehicles, pedestrians, and obstacles across 10,000+ frames.
- Maintained annotation accuracy above 98% through rigorous validation, directly contributing to improvements in deep learning model precision.
- Coordinated with a 12-person distributed team to ensure consistency in annotation guidelines across large-scale datasets.

PROJECTS

RAG-Powered Document Intelligence System <https://github.com/satyamsharma58025> 2024

- **Stack:** LangChain · LlamaIndex · pgvector · OpenAI API · FastAPI · React.js
- Built an end-to-end RAG pipeline that ingests PDFs and URLs, chunks and embeds documents using OpenAI embeddings, and stores vectors in pgvector for semantic retrieval.
- Implemented hybrid retrieval (dense + sparse) reducing hallucination rate by **~30%** compared to naive prompt-stuffing baseline.
- Deployed on GCP with Docker; supports multi-user sessions with context isolation and response streaming via WebSockets.

Agentic AI Task Planner (Multi-Agent System) <https://github.com/satyamsharma58025> 2024

- **Stack:** LangGraph · OpenAI Function Calling · Node.js · React.js · MongoDB
- Architected a multi-agent orchestration system using LangGraph with planner, executor, and critic agents, enabling autonomous decomposition and execution of complex tasks.
- Integrated MCP (Model Context Protocol) for dynamic tool registration, allowing agents to call external APIs and databases without hardcoded schemas.
- Reduced task completion latency by **45%** through parallel agent execution and result caching with Redis.

CS Algorithm Visualizer <https://csvisualizer.netlify.app/> 2023

- **Stack:** React.js · JavaScript · CSS Animations · Netlify
- Built an interactive visualization platform for 20+ sorting, searching, and graph algorithms with real-time step-by-step animation controls.
- Achieved **500+ monthly active users and 4.8/5 rating** from student feedback; used as a teaching aid in the classroom.

School Official Website <https://www.rmsbalichela.org/> 2024 – Present

- **Stack:** React.js · Node.js · Express.js · MongoDB · AWS S3
- Sole developer responsible for architecture, development, deployment, and ongoing maintenance of the institution's public-facing website.
- Implemented a CMS-style admin panel for faculty to publish notices and events without developer intervention, saving 3+ hours/week of manual updates.

EDUCATION

Master of Computer Applications (MCA) — Pursuing 2025 – 2027
Indira Gandhi National Open University (IGNOU)

Bachelor of Computer Applications (BCA) 2021 – 2024
Kolhan University, Jamshedpur Co-operative College

ACHIEVEMENTS & LEADERSHIP

- **GitHub Community Founder & Organizer** — Founded and grew a developer community to **2,500+ active members**, organizing monthly code reviews, hackathons, and AI/ML study groups.
- **Runner-Up, National Coding Competition** — Ranked 2nd out of 400+ participants, demonstrating strong algorithmic problem-solving under pressure.
- **Outstanding Developer Recognition** — Awarded by Ricoz Software Solution for exceptional backend contributions and API performance optimization during internship.
- **Open Source Contributor** — Contributed bug fixes and documentation to 3 LangChain-ecosystem repositories; PRs merged into main branch.
